This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

REPORT OF SECRETARY OF STATE.

OFFICE OF THE SECRETARY OF STATE,
COLUMBUS, OHIO, *December* 14, 1886.

To the Honorable JOSEPH B. FORAKER,
Governor of the State of Ohio:

The annual report of this office for the year ending November 15, 1886, is herewith respectfully submitted:

CORPORATIONS.

There have been 882 articles of incorporation filed during the year. The following is a classification and comparison of same with the number filed during the three preceding years:

Character of Corporations.		1884 and 1885.	1882 and 1883.	1881 and 1882.

This is the largest number of incorporations ever filed in this office, save in 1882. Beginning with 1873, the number has been as follows:

Years.	Numbers.	Years.	Numbers.
1873	405	1880	544
1874	361	1881	840
1875	396	1882	909
1876	374	1883	876
1877	361	1884	784
1878	289	1885	779
1879	338	1886	882

The authorized capital stock of the corporations formed with a capital stock during the past year, as compared with the previous year, has been as follows:

Classes of Corporations.	1886.	1885.
Manufacturing Companies	$27,410,900	$16,674,500
Electric Light Companies	391,000	300,000
Cemetery Associations	3,000	11,500
Street Railway Companies	587,500	1,605,000
Co-operative Associations	38,000	24,000
Telegraph and Telephone Companies	122,000	130,000
Banks	380,000	85,150
Companies for various purposes	13,525,650	5,101,400
Gas Companies	3,770,000	2,222,350
Printing and Publishing Companies	578,000	1,086,500
Mining Companies	4,784,800	785,000
Railway Companies	19,124,000	36,466,200
Building and Loan Companies	35,292,000	28,600,000
Insurance Companies	100,000	.....
Colleges	10,100	.....
Totals	$106,116,950	$93,091,600

This is an increase of $13,025,350 over 1885, and $6,986,200 over 1884. There has also been seven agreements of consolidation filed by railroad companies, with an aggregate capital of $48,547,000, as compared with one such consolidation last year with a capital of $8,720,000.

There has also been one consolidation between bridge companies filed, with a capital of $1,000,000. Sixty-nine companies have increased their capital stock, in the aggregate from $20,792,375 to $57,576,000, a total increase of $36,783,625, as compared with a total increase last year of $13,891,460, by 58 companies.

Twelve companies, as compared with ten companies last year, have

Digitized by Google

reduced their capital from $4,673,875 to $4,388,125, the reduction last year being from $2,577,010 to $1,050,990. Fourteen corporations have changed their names as against 16 last year. Fifteen miscellaneous certificates have been filed as compared with 18 last year. An effort has been made to have as many companies as possible file certificates of subscription under section 3244 Revised Statutes, a thing hitherto neglected in many cases. The number filed has been 385, compared with 282 last year. Eleven railway equipment contracts have been filed in this office as compared with 10 last year. The large increase in corporate enterprises shown by these figures is fairly indicative of a growing activity in business throughout the State. A list of incorporations during the year will be found in the accompanying statistical report.

FEES.

The large growth in corporations is met with a corresponding increase in the fees of the office. The fees last year, derived chiefly from new incorporations, amounted to $17,110.27. This was then thought to be a large sum. But this year the sum is still greater, amounting to $22,152.89, more than $70 per day for each working day of the year, and more than $5,000 over last year.

These fees are chiefly the result of legislation enacted March 18, 1884, and which in my last report was characterized as in many respects unjust and oppressive. At my suggestion the Legislature last winter removed one of the bad features of this law, and I trust that when the State can spare the revenues arising under it, it will be still further amended. As a revenue measure it is a marked success, paying all the expenses of this department and furnishing a surplus. After another year's experience with it, however, there is nothing in the general opinion of it expressed in my last report that, in my judgment, calls for any alteration in the views there stated. The main object proposed by the promoters of this law was to diminish the number of incorporations, they being thought to be destructive of private enterprise, personal responsibility and individual effort. However this may be, the result proposed has not yet been attained, for excepting one other year, the number of incorporations during the year last past has been greater than ever before. In fact, this fee law seems to have aided in increasing the number of incorporations. Americans are very apt to estimate the value of a thing in accordance with its cost. Corporate franchises are valued higher in Ohio to-day than ever before, since it costs something to obtain them. If it be desirable to keep down the number of corporate enterprises, then the Secretary of State should be invested with some

Digitized by Google

discretion as to permitting the filing of articles of incorporation. As it is now, his duties as regards corporations are purely clerical, and if the forms of law be complied with, he has no more discretion in allowing the formation of all kinds of corporations, good and bad, than has a county recorder in reference to the filing and recording of a deed.

WEIGHTS AND MEASURES.

At the close of last year, eight sets of weights and measures remained on hand unsold. One set of these has been sold during the year to each of the cities of Columbus, Toledo and Lima. For these three sets $345 has been received. The remaining five sets are yet in my possession.

GEOLOGICAL REPORTS.

Of the 113 copies of volume V. of the Geological report remaining in my hands at the close of the last fiscal year, 35 have been sold at $1 per volume; 78 copies yet remain in my hands unsold.

RECEIPTS.

The receipts of this office are derived from fees and from the sale of weights and measures and geological reports above-named. The receipts last year amounted to $17,325.53. This year they have amounted as follows:

Fees	$22,152 89
Sale of weights and measures	345 00
Sale of geological reports	35 00
Total	$22,532 89

EXPENSES.

The expenses of the office for the fiscal year have been as follows:

Salary of Secretary of State	$3,000 00
" Chief Clerk	2,000 00
" Statistical Clerk	1,500 00
" Stationery "	1,350 00

Total expenses	$14,917 39
Total receipts	22,532 89
Excess of receipts over expenses	$7,615 50

MUNICIPAL CORPORATIONS.

During the year six villages and one hamlet have been incorporated, two cities and five villages have filed certificates of annexation of territory, whilst two villages have been advanced to villages of the second-class. A list of all these will be found in the accompanying statistical report.

SUPREME COURT REPORTS.

During the year the following number of volumes of the Supreme Court Reports have been issued:

To the clerk of Jackson county, volume 7 Ohio Reports, volumes 6, 19 and 25 Ohio State Reports, one copy of each. To the clerk of Clarke county, volumes 33 and 40 Ohio State Reports, one copy of each. To the State School Commissioner, volumes 41 and 42 Ohio State Reports, one copy of each. To the Supreme Court, volumes 40, 42, 35 Ohio State Reports, one copy of each. To the Supreme Court, volume 43 Ohio State Reports, twenty copies. To clerks of counties in Ohio, eighty-eight copies volume 43 Ohio State Reports; eight copies of same to the Territories, and thirty-seven copies to the States. The three complete sets of Ohio Reports (volumes 1–20, inclusive), and Ohio State Reports (volumes 1–40), loaned by me to the Supreme Court in 1885, still remain in the hands of that body; also, the 3 sets of Ohio and Ohio State Reports, loaned to the Supreme Court in 1883, have not yet been returned. The contract for the printing of these Reports, now held by Robert Clarke & Co., of Cincinnati, will expire on the 22d day of June, 1887. It will therefore be necessary for the present General Assembly, at its next session, to pass a joint resolution authorizing the making of a new contract. The following is a tabular statement of the number of Reports on hand:

REVISED STATUTES.

At the close of the last fiscal year there remained in the hands of the Secretary of State 744 copies of the Williams 3-volume edition of the Revised Statutes, containing the laws passed since 1879 to 1883, inclusive, in a separate volume. During the year forty-two sets of these were issued to the Senate, 117 to the House of Representatives, as required by law and resolution, and on requisition, one to the Attorney-General, one to the Supreme Court, one to the State Board of Health, and one to the Dairy Commissioner; in all, 163 sets. Of these, nineteen sets were returned by the General Assembly. This leaves 600 sets on hand. There are also in my hands forty-eight sets of the Revised Statutes, original edition, and which are imperfect.

PRINTING PAPER.

On Monday, September 6, 1886, the contracts were awarded for furnishing paper to the State for the year beginning November 1, 1886.

These contracts were awarded at the lowest rate ever yet secured by the State. The following is a tabulated statement of rates, compared with those of former years, beginning with 1880, the figures given being the number of cents per pound to be paid for each kind of paper:

$39,146.05 have been expended for printing paper during the year, an increase over last year of $2,868. In the sum first named, however, there is included $6,354.48, for paper ordered and delivered prior to November 15, but not accepted and paid for, and consequently not used during the year last past. With propriety this $6,354.48 might be deducted from the $39,146.05, and accounted for during the next year, which would leave $32,791.51 as the amount expended for printing paper used during the year, or $3,486.48 less than last year.

STATIONERY.

This is one of the funds in the expenditure of which, the only means the Secretary of State has of exercising any economy, consists in making purchases at low prices, and in keeping down the stationery expenses of his own department. Over the amount of stationery drawn by the other departments and the General Assembly he can exercise no control. The value of the stationery used by this department has been reduced from $366.74 in 1885, to $276.68 in 1886. The purchases of stationery have been made at lower prices than ever before. Yet, owing to the extravagance of some of the departments in the amount of stationery drawn out for their use, to the long session of the General Assembly, to the numerous legislative committees requiring stationer , to an increase of nine in the membership of the General Assembly, nd to the creation of new officers, the amount expended for stationery during the year, including a liability of $10.85 unpaid, has been $8,672.75,

as compared with $8,005.60 in 1885; whilst the value of the stationery used has been $8,807.47, as compared with $8,525.19 in 1885. The following is a tabulated statement of the amount of stationery used by the two Houses of the General Assembly and the several departments during the year, as compared with the four previous years:

STATISTICS.

The vital statistics, prepared by this department for many years, are of little value, compared with what they might be, if the General Assembly would provide an adequate means for their collection. My

Digitized by Google

predecessors have urged the importance of a change in this matter, but without result. Yet of all the statistics gathered by the Secretary of State, these are probably the most important. A record of marriages, births, deaths, divorces and diseases is included in a perfect registration of vital statistics. The object of such record has been declared by an able writer to be fourfold:

1. For legal purposes, being intended to identify individuals in their relations to their families and to the community; and its utility and desirability rest upon substantially the same grounds as those of the recording of titles of property.

2. For the prevention and detection of crime.

3. So far as births and deaths are concerned, the object is to furnish data for sanitary purposes; that is, to give warning of the undue increase of disease or death presumed to be due to preventable causes; and also to indicate the localities in which sanitary effort is most desirable and most likely to be of use.

4. To collect data for scientific purposes as bearing on the laws of human development.

It is obvious that these purposes are important, and that a systematic and accurate registration of vital statistics is a thing much to be desired. The first attempt at collecting such statistics in Ohio was made by the late E. D. Mansfield, then Commissioner of Statistics, an office since abolished. In his first annual report, printed in 1858, speaking of such statistics, he says:

"It must be obvious that they are in the highest degree important, in a social, legislative, or political aspect. They exhibit both the movement and the causes of movement in society, the strength, intelligence and morality of the population, or the causes which lead to its decay and demoralization."

In this report Mr. Mansfield speaks of the difficulty of obtaining such statistics, a difficulty which becomes evident to every one who attempts the subject. As to marriages, section 6391, Revised Statutes, which requires a certificate of the marriage to be transmitted by the person solemnizing the same to the probate judge, and by him recorded, is a good law. Under it approximately correct statistics of marriages have been obtained. Yet these statistics are merely a fair approximation. Many persons solemnizing marriages neglect to report marriages, whilst others refuse. There seems to be no way to remedy this. The law already imposes a penalty, but this is never collected. The number of marriages reported in 1885 was 28,773, as compared with 28,720 in 1884. An eminent French statistician has remarked, that in France

Digitized by Google

the number of marriages in a given time fluctuates in an exact ratio with the price of breadstuffs. In Ohio the number of marriages has fluctuated upwards and downwards according as the country has been prosperous or otherwise. The following is a table showing the number of marriages reported for a number of years:

Year.	Number.	Year.	Number.
1860	23,106	1873	26,460
1861	22,251	1874	26,678
1862	19,540	1875	23,489
1863	19,300	1876	26,183
1864	20,881	1877	25,156
1865	22,198	1878	25,796
1866	30,479	1879	26,399
1867	29,230	1880	27,805
1868	28,231	1881	28,566
1869	23,910	1882	30,528
1870	25,459	1883	30,659
1871	24,627	1884	28,720
1872	26,303	1885	28,773

The falling off in the number of marriages during the Rebellion is noticeable; also the large increase immediately after the war. In 1875, in the midst of the hard times, the number is but slightly in excess of the number in 1860 With the beginning of prosperous times in 1879, the number again begins to increase, until in 1884 and 1885, the number again declines. As regards divorces, the ratio of divorces to marriages during the past seventeen years, has been as one to twenty-five. The number for a series of years has been as follows:

Year.	Number.	Year.	Number.
1866	1,169	1876	1,236
1867	975	1877	1,289
1868	847	1878	1,432
1869	1,003	1879	1,472
1870	1,008	1880	1,578
1871	1,077	1881	1,673
1872	1,026	1882	1,806
1873	1,224	1883	1,965
1874	1,159	1884	1,741
1875	1,299	1885	1,654

Our statistics concerning divorces are as nearly correct as they can be obtained. They are prepared by the county clerks from the re ords of the common pleas courts. As to the marriages, the number is nearly correct, and would be absolutely so if persons solemnizing marriages

would make proper returns to probate judges. This, as stated above, some of them do not do, and some will not do. Nor are the facts certified to the probate judges as full as they should be for legal purposes. But the principal inaccuracy in the vital statistics is found in the report of births and deaths. These returns are compiled by the probate judges from reports made by the township and ward assessors. However intelligent they may be, assessors are not the proper persons to gather these statistics. It is to many of them the most inconsequential part of their duties. As to births, some of them send in very fair reports; others do not, and as a result the reports of births reported by this department can not always be relied on. It is of the utmost importance that not only the number of births should be accurately reported, but also that a correct register be made of the names of parents, time and place of birth, and other circumstances attending the same. The remark of Dr. Snow, made twenty five years ago, that it would be probably impossible for a large portion of the middle-aged men and women in the United States to prove that their parents were ever married, and that they have any legitimate right to the name they bear, holds good to a large extent in Ohio to-day. Our General Assembly, in my opinion, could scarcely do a wiser thing than to remedy the present imperfect registration of births in Ohio. The total number of births and deaths reported in Ohio for a series of years, has been as follows:

Year.	Deaths.	Births.	Year.	Deaths.	Births.
1868	17,158	37,089	1877	28,460	63,563
1869	15,159	30,150	1878	25,440	69,300
1870	23,683	61,198	1879	28,179	65,132
1871	25,149	59,957	1880	27,446	62,422
1872	25,202	61,210	1881	32,359	71,093
1873	27,112	58,977	1882	34,173	69,914
1874	28,756	61,553	1883	29,368	70,219
1875	28,916	60,523	1884	29,753	73,149
1876	26,975	62,952	1885	35,912	71,725

These figures were compiled from the reports of assessors. They are not even a fair approximation of the true number of births and deaths. Thus, in 1870 the number of births reported was more than twice the number reported in 1869. The number of births reported is about double the number of deaths. This is obviously incorrect, and shows that a large number of deaths have not been reported. In round numbers, the number of births reported in 1885 was 70,000; the number of deaths 35,000, or twice as many births as deaths. This result is

found in the reports of no other State or country where correct returns have been gathered. Generally, the birth rate is only slightly in excess of the death rate, and were correct reports made, this result would doubtless be obtained in Ohio. In Cincinnati, in 1885, the registration of births and deaths showed: Births, 7,958; deaths, 5,973; in 1880, deaths, 5,177; births, 7,945. Estimating the population of Ohio at 3,500,000, the death rate, according to the returns made to this office, is but ten in a thousand, whilst the birth rate was fifty in a thousand. Yet the probable death rate in Ohio is from eighteen to twenty in the thousand. In the healthy State of New Hampshire the death rate is over eighteen in the thousand. In New Jersey the death and birth rates for five years have been: Death rate, 19.63; birth rate, 21.47. In Massachusetts, in 1881, the death rate was 19, the birth rate, 25.53. In England, in 1880, the death rate was 20.5. In Scotland, in 1878, it was 21.3. In the whole United States, in 1880, it was between 17 and 19. The death rate in some of the principal cities of Ohio and the United States in 1880, was as follows:

Charleston, S. C.	32.
Memphis	31.
New Orleans	25 98
New York	25.89
Washington	23.57
Boston	22.74
Providence	19.84

The death rate in Cincinnati, Cleveland and Dayton in that year was 19.20, 19.84 and 14.86, respectively.

One looking over these figures will see at a glance that our system of registering births and deaths is a complete failure. The people of Ohio have for years been expending large sums of money, directly and indirectly, for the designed purpose of collecting correct vital statistics. This money has been practically thrown away, the statistics gathered under the present system being of little value. The General Assembly should, in my judgment, be recommended to remedy this state of affairs by adopting a new method of gathering such statistics. From an examination of the reports and legislation of other States, I am satisfied more satisfactory results could be obtained were the following general plan adopted:

1. Make clerks of townships and clerks of municipalities, having no board of health, ex-officio registrars of vital and social statistics.

2. Make it the duty of the physician, midwife or other person under whose care a birth shall have taken place, or in case there have been none

of these, of the husand, if none, of the mother of the child, should the mother die in the child birth, of any reputable citizen, resident in the corporation or township where the birth occurs and cognizant of the facts and circumstances of such birth, to make out at once a record of such birth, and forward the same forthwith, duly signed by him, or her, in the form of a certificate, to the clerk of the township or corporation, or, where that for any cause can not be done, to the probate judge of the county, which record and certificate should set forth, as far as the same can be ascertained, the full name of such child, if any name shall have been conferred, its sex, color, the full name as well as occupation of the parent or parents, names of any other child or children living, and, for better identification, the full name previously to marriage of the mother of such child, and the day and hour and place on and at which such birth occurred, and any circumstances connected with such birth that may be deemed of value, in case such birth shall have occurred without the superintendence of any person.

3. Make it the duty, when a death occurs, of the attending physician or surgeon, if none, of the parents or surviving parent of the deceased, if none, of the nearest of kin, not a minor, resident in the township or corporation, if none, of the resident householder where the death has occurred, if none, of any reputable citizen cognizant of the circumstances of the death, if the death be the subject of inquest, of the coroner or other officer holding such inquest, to make out at once a record of such death, and return the same duly signed by him or her forthwith, in the form of a certificate, to the clerk of the township or corporation in which the death has occurred, which record and certificate should contain, as far as the same can be ascertained, the full name, sex, age, and color of the person deceased, the name of his or her parents, the occupation, place of birth, and the period, place and disease or cause of death, if married at the time of death, the name of the husband or wife, as the case may be, and any other circumstances of interest or value in identifying the decedent and the cause of his or her death.

4. Empower township and corporation clerks, and, if for any cause they are incapable of acting, the probate judge, to issue burial permits when certificates have first been properly made of the death of the decedent.

5. Make it unlawful for any undertaker or sexton to bury any corpse, except where such burial permits have first been obtained.

6. Provide that township and corporation clerks shall keep a full and complete register of births and deaths, which shall contain all the matter set forth in the foregoing certificates, and that annually they

Digitized by Google

shall return a certified copy of the entries for the year to the probate judge of their county.

7. Provide that a certified copy of the entries made upon the township or corporation register, or of these entries as returned to the probate judge, shall be *prima facie* evidence in all suits.

8. Provide that the probate judge shall, annually, make a consolidated abstract of the township and corporation returns to the Secretary of State, upon blanks to be by him provided, or by the Board of Health of the State.

9. Provide that in municipalities having boards of health, the board shall annually make to the probate judge a report of births and deaths, similar to that required of clerks of townships and municipalities having no board of health.

10. Give the probate judges and clerks a liberal compensation for their work. Without this the work is certain to be slighted.

No doubt any plan that might be proposed will meet with criticism and objection. In fact, any legislation hereafter enacted is certain in its enforcement to meet with many practical difficulties, whatever may be its provisions. Yet the experience of other States has shown that the collection of vital statistics upon the general plan outlined above, has been the most successful in its results of any yet devised. The General Assembly last winter made the Secretary of the State Board of Health the Superintendent of Vital Statistics, leaving the clerical duties and the safe-keeping of the Bureau to this Department. This, however, did not change the methods of collecting such statistics. These are prescribed by law, and until they are changed, there is nothing the State Board of Health or the Secretary of State can do to alter the present unsatisfactory condition of the matter.

Accompanying this will be found the customary statistical report, which the law requires the Secretary of State to make.

APPROPRIATIONS.

The following is a statement of the amount of each appropriation made for the department available during the year, of the expenditures and liabilities unpaid for the year, and of the balance in each fund at the close of business hours on November 15, 1886. The expenditures for stationery and printing paper are for all the departments, including my own:

NOTE.—The number of mortgages reported canceled from Ashland county date from January 4, 1866, to June 30, 1886.

The Recorder of Muskingum county states that it is impossible for him to give number of cancellations, because no record is kept of same.

Recorders of two counties, instead of reporting cancellations and amounts released in detail, as given in the table above, reported total number of cancellations and amounts released as follows:

Butler, cancellations, 812; amount released, $1,156,215.
Franklin, " 1,960; " " 1,989,742.

No cancellations were reported from Logan, Montgomery, Muskingum and Union counties.

Washington county reports 127 mortgages canceled on city, town and village lots, without giving amount released.

Hamilton county reports total number of mortgages canceled, 3,699, without giving amount released.

PUBLIC DEBTS IN OHIO—STATE AND LOCAL.

The following exhibit, so far as it relates to the State debt, is derived from the books of the Commissioners of the Sinking Fund, and shows the transactions in, and the present condition of—

THE PUBLIC FUNDED DEBT OF THE STATE.

On the 15th day of November, 1885, the public funded debt of the State was		$3,720,229 19
This sum consisted of the following loans:		
Loan payable after December 31, 1886, bearing 6 per cent. interest	$2,243,564 19	
Loan payable July 1, 1886, bearing 4 per cent. interest	375,000 00	
" " 1, 1887, " " "	500,000 00	
" " 1, 1888, " " "	600,000 00	
Canal loan, not bearing interest	1,665 00	
Total funded debt		$3,720,229 19
The following redemptions have been made since that date:		
Loan payable July 1, 1886, bearing 4 per cent. interest		375,000 00
On the 15th day of November, 1886, the public funded debt of the State was		3,845,229 19
This sum consists of the following loans:		
Loan payable after December 31, 1886, bearing 6 per cent. interest	$2,025,139 19	
Loan payable July 1, 1887, bearing 3½ per cent. interest	500,000 00	
" " 1, 1887, " 4 " "	500,000 00	
" " 1, 1888, " 4 " "	600,000 00

There were re-valuations of the real property of the State for the years 1826, 1835, 1841, 1847, 1854, 1861, 1871 and 1881.

NOTE.—*Prior to* 1826, real estate only was brought upon the duplicate for taxation for State purposes. Funds for county purposes were derived from a poll-tax, and a tax upon horses, mules and cattle, to which was added, by legislative appropriation, a percentage from one-fifth to one-half, varying with the several years, from the taxes levied upon real estate.

Under the act of February 3, 1825, which took effect *March* 1, 1826, all taxable property was placed upon the grand duplicate, viz., lands and town-lots, including

buildings, horses, cattle, pleasure carriages, over the value of one hundred dollars, and merchants' and brokers' capital, to which was added, "money loaned at interest," and "all grist, oil, and saw mills; all manufactories of iron, glass, paper, clocks, and nails; all distilleries, breweries and tanneries; all iron, brass and copper foundries," under the act of *March* 14, 1831.

Under the act of *March* 2, 1846, a new system of taxation was inaugurated, which, with various slight modifications, is now in force.

The total does not include the *per capita* tax on dogs, which amounted in 1885 to $207,393.

AGGREGATE VALUATION AND RATES OF TAXATION.

The following pages give the aggregate valuations of all the real and personal property placed upon the duplicate for taxation in each *township*, *town*, *city*, *village*, and *separate school district* in the State, and the rates levied upon such property, stated in mills and decimals, upon each dollar for 1885 and 1886. The number of mills will therefore indicate the amount of tax in dollars upon each thousand dollars of valuation.

The rate is inclusive of two and nine-tenth mills levied for State purposes, and thus shows the entire tax for all purposes in each locality, except in rare instances where taxes for purely special purposes—such as taxes for road improvements, where abutting property only is taxed and collected on a separate duplicate, or where assessments are made against city lots at a rate per foot front—are placed upon the duplicate for collection for the benefit of contractors.

*Average cost per day for each pauper at infirmary only.

NOTE.—There are two infirmaries in the county of Hamilton. One is controlled by the city of Cincinnati and the other by the county outside of the city. The expenditures given in the table above are those of the county infirmary only, the report of the superintendent of the city infirmary not giving expenditures. The number of inmates as given includes both institutions. The reports of the two institutions, separated, are as follows:

County Infirmary—Number of paupers in institution on first Monday in September, 1885, 260; number admitted during year, 262; number discharged during year, 282; number remaining on first Monday in September, 1886, 240. Total cost of keeping paupers in infirmary during year, $30,069.72; amount expended for temporary relief to people outside of infirmary, $7,433.65; total expenditures, $38,103.37.

City Infirmary—Number of paupers in institution on first Monday in September, 1885, and admitted during year combined, 1,159; number discharged, 401; number remaining on first Monday in September, 1886, 755. Expenditures not stated.

The data given in table above for the city of Cleveland was taken from report made to the Secretary of the Board of State Charities by the superintendent of the infirmary of that city. The county of Cuyahoga has no infirmary.

*Exclusive of Cuyahoga and Hamilton counties.

NOTE.—The number of births given for Cuyahoga and Hamilton counties in table above are for the cities of Cleveland and Cincinnati, and do not include births in any part of those counties outside of the limits of the two cities. The figures thus presented were taken from reports kindly furnished by the Boards of Health of the cities of Cleveland and Cincinnati, respectively, and subsituted for those contained in the reports of the Probate Judges of the two counties, which, in both instances, showed a lesser number of births for the counties entire, than those presented show for the cities of Cleveland and Cincinnati alone.

NOTE.—The data from Cuyahoga and Hamilton counties given in the "total" column of the table above were those kindly furnished by the Boards of Health of the cities of Cleveland and Cincinnati, respectively, and represent the number of deaths in the two cities, Cleveland and Cincinnati; the reports of the Probate Judges of the two counties being so inaccurate, showing by far a less number of deaths for the two counties entire than the reports of the Boards of Health show for the cities a one, as to make them practically unfit for statistical purposes hence, the figures taken from the reports of the Boards of Health of the two cities for the years 1885 and 1886, covering twelve months, ending with March 31, 1886, have been substituted for those furnished by the Probate Judges of the two counties. The number of deaths that occurred in the two counties outside of the two cities could not be ascertained

In all the tables following under the head of "Vital and Nosological Statistics," showing the number and cause of deaths, etc., the counties of Cuyahoga and Hamilton have been omitted.

NOTE.—One death of an infant was reported from Crawford county, sex and color unknown. Montgomery county, two inquests, sex unknown. The report from Greene county states that, owing to the sudden rise of "Shawnee Run" on the night of May 12, 1886, twenty-eight persons were drowned, upon the bodies of whom no inquests were held. The report from Hamilton county was made by the Coroner, hence does not include inquests that may have been held by Justices of the Peace. The Clerk of Courts of Huron county states that the information furnished his office by the Coroner, and Justices of the Peace, of inquests held in Huron county, is very unsatisfactory. In Licking county two inquests were held on the body of John Douglass, one by a Justice of the Peace, and another by the Coroner of the county. The Clerk of Courts of Summit county states that the three inquests reported by him were held by Justices of the Peace, and that the Coroner of the county never reports inquests to his office.

The counties of Fulton, Gallia, Geauga, Henry, Holmes, Medina, Morgan, Sandusky and Williams, omitted in table above, did not report any inquests.

NOTE.—The "unofficial" printed list of Senators of the Fiftieth Congress, received from Washington, D. C., contains the name of David Turpie, as one of the Senators from the State of Indiana. The legality of the election of Mr. Turpie by the Legislature of the State of Indiana is in dispute, the Republicans claiming that there was no election of a U. S. Senator, and the Democrats *vice versa*.

REPORT OF THE OHIO BOARD OF PHARMACY.

COLUMBUS, O., *November* 16, 1886.

Hon. J. S. Robinson, Secretary of State:

SIR: Agreeable to the demand of the law regulating the practice of pharmacy, as Secretary of the Ohio Board of Pharmacy, I have the honor to submit to you my annual report, being the third since the establishment of our Board.

The following gentlemen constitute the Board:

John A. Nipgen, of Chillicothe. F. T. Bower, o Toledo.
Edgar M. Hatton, of Zanesville. Jno. Weyer, of Cincinnati.
Philip H. Bruck, of Columbus.

The vacancy caused by the death of Prof. E. S. Wayne was filled by the appointment of Jno. Weyer for the unexpired term, and Governor Foraker honored E. M. Hatton, whose term expired in April, by a reappointment.

In the death of Prof. Wayne, pharmacy lost one of its most faithful workers who had been identified with its interests for two score years, and whose attainment and standing was acknowledged by all who had the pleasure of his acquaintance, and the benefits of his researches in the line of practical pharmacy.

The Board held meetings during the past fiscal year as follows:

Cincinnati, January 11, 1886. Columbus, June 29, 1886.
Columbus, March 3, 1886. Toledo, August 3, 1886.
Columbus, May 10, 1886. Cleveland, October 11, 1886.

There appeared for examination at these meetings 304 persons, of whom 159 passed a satisfactory examination, to whom were awarded certificates of competency to register, being 52 per cent. of the number examined, as against 57 per cent. in 1885, and 70 per cent. in 1884.

Of the 159 successful applicants, 97 were entitled to register as pharmacists and 62 as assistant pharmacists.

A list of the persons who passed a satisfactory examination, and who registered, is attached hereto, and forms part of this report.

The total number of pharmacists registered is 3,026; of assistant pharmacists, 1,080, being an increase in pharmacists of 94, and of assistants of 59 since the last report.

The financial condition of the Board at this date is as follows:

Balance on hand, last report	$6,314 37
Amount received from registration fees	398 00
Total	$6,712 37
Expenditures during past year	1,453 26
Balance on hand November 15, 1886	$5,259 11

An itemized statement of the expenditures of the Board is attached hereto, and forms part of this report.

In all civilized governments the practice of pharmacy is considered of such importance to the general welfare of the public, that legal restrictions have been placed upon those desiring to enter the profession. In our State the law regulating the practice of pharmacy demands that the person intending to assume the business of selling drugs at retail for medicinal purposes must pass a satisfactory examination before our Board, before he is permitted to do so.

To still further protect the public, a law has been placed on our statute books to protect the adulteration of drugs and medicines. It is certainly superfluous to speak of the need of *pure* drugs, and of the compounding of the same by persons skilled by studious research, as well as by active experience.

The physician, who prescribes for his sick patient, and is anxiously awaiting the certain and efficient action of the medicine prescribed, can, more than any other one, appreciate the value of a conscientious preparing of his prescription.

The welfare of his patient is at stake, as is also his reputation as an able and learned physician.

He has made the correct diagnosis of the case, has selected the remedies best adapted to combat the disease, and to restore to the patient his health, and needs the service of the pharmacist to aid him in his endeavor to assist nature. He wants pure and unadulterated medicines, and he needs the conscientious and skillful pharmacist to prepare and combine the same.

Although we have the law against adulteration on our statutes, we have no person whose duty it is to investigate and examine the drugs and prosecute those who are guilty. I would suggest that the chemists in the employ of the "Dairy and Food Commission" be authorized also to give their attention to adulteration of drugs, and, if needed, increase the number of chemists to meet the requirements.

The public should see that the persons from whom they purchase their drugs and medicines have conspicuously exposed their certificate of registration, as that is the notice to the public that the holder is legally entitled to practice pharmacy in our State; and the absence of such certificate is evidence of the want of such legal competency, and proof that the person, not being a law-abiding citizen, not only does not merit their favors, but is deserving of the public's severest censure.

Respectfully,

PHILIP H. BRUCK, *Secretary.*
